

AKARSH MISHRA

B.Tech CSE — Artificial Intelligence | PSIT, Kanpur

akarshakmishra47@gmail.com | linkedin.com/in/akarshak-mishra-b75503383 | github.com/akarshakmishra47-afk

CAREER OBJECTIVE

B.Tech CSE student specializing in Artificial Intelligence with a strong interest in AI/ML, Full-Stack Development, Data Structures & Algorithms, and emerging technologies. Experienced in developing web-based applications, AI-powered systems, REST APIs, and data-driven solutions. Passionate about solving real-world problems, participating in hackathons, and continuously improving programming and software development skills.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur

B.Tech — Computer Science & Engineering (Artificial Intelligence) | 2025–2029 | **CGPA: 8.84 / 10**

Sem 1 SGPA: 8.86 | Sem 2 SGPA: 8.82

Kendriya Vidyalaya — Intermediate (Class XII) | 2024 | **80.2%**

Kendriya Vidyalaya — High School (Class X) | 2022 | **77.8%**

TECHNICAL SKILLS

Programming: C, C++, Python, Java, JavaScript, TypeScript, SQL

Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT, Bcrypt

Database: MongoDB Atlas, Supabase, SQL

AI/ML: Generative AI, Groq AI, XGBoost, Random Forest, AI Agents

Tools & Deployment: Git, GitHub, Vercel, Render, GoDaddy, Cron Jobs

Problem Solving: Data Structures & Algorithms, C++, Competitive Programming

PROJECTS

Vidya-Setu — Student-Centric Education & Career Portal | Node.js, Express.js, MongoDB, JavaScript, Groq AI

- Developing a centralized platform for academic resources, scholarships, career opportunities, and student-support services.
- Built an automated Job & Internship Engine using Cron services to collect live opportunities and store structured data in MongoDB.
- Integrated an AI-powered Resume Intelligence module using Groq AI and PDF parsing for resume analysis.
- Designed 14+ database schemas covering authentication, scholarships, marketplace, and other student services.
- Implemented secure authentication using JWT and Bcrypt.

National Rail Command (RailVerse AI) | Next.js 15, TypeScript, Python, Tailwind CSS, XGBoost

- Developed an AI-powered intelligence platform for analyzing and supporting Indian Railway operations.
- Built a Railway Digital Twin using Leaflet and React Flow for visualizing train movement and operational scenarios.
- Implemented train-delay prediction using XGBoost with a reported 94.2% accuracy.
- Developed a crowd-prediction system using Random Forest.
- Created an AI Decision Center for natural-language operational queries and scenario-based analysis.
- Implemented a multi-agent AI architecture for railway intelligence and decision support.

YouTube Clone | HTML, CSS, JavaScript

- Developed a responsive YouTube-inspired video browsing platform.
- Implemented a modern video browsing interface with responsive layouts and interactive components.
- Deployed the application using cloud hosting.

Jokes API | Node.js, REST API

- Developed a backend REST API for managing and serving jokes.
- Implemented structured API endpoints and request/response handling.
- Focused on clean backend architecture and API usability.

HACKATHON & TEAM EXPERIENCE

- **Adobe University Hackathon 2026 — Team NexForge:** Collaborated with a team to develop a technology-driven solution; contributed to development, technical discussions, and solution design.
- **Smart India Hackathon / Railway Innovation:** Contributed to an AI-powered railway traffic-control and intelligence solution, including frontend development, AI integration, system architecture, and technical discussions.
- **Far Away Challenge — Zuup | Team Tech Hustlers:** Developed and submitted an MVP for Round 1; contributed to technical development and solution implementation.
- **Grand Tech Racing (GTR) — Bennett University:** Participated in competitive technology racing with Team Heerakund Factory Workers.
- **Axelerate — IIT-BHU Tech Festival:** Engineered and participated in RC car racing with Team Tech Hustlers.
- **Brain War 2026 — CodeArenas:** Participated in a national-level technology quiz competition.

CERTIFICATIONS

- **Ethical Hacking 101** — Simplilearn
- **AI for All** — TCS iON
- **Technical Coursework** — Apna College
- **Specialized Certifications** — Coursera

PROBLEM SOLVING

- Practicing Data Structures & Algorithms using C++.
- Developing problem-solving skills through programming challenges.
- Applying algorithmic thinking to software and AI projects.
- Strong foundation in arrays, strings, sorting, searching, hashing, and fundamental DSA concepts.

AREAS OF INTEREST

Artificial Intelligence & Machine Learning | Generative AI | Full-Stack Development | Data Science | Software Development | Web Development | Data Structures & Algorithms

SOFT SKILLS

Problem Solving | Team Collaboration | Research & Analysis | Technical Communication | Leadership | Adaptability | Continuous Learning
